SUMMARY

Frontend Software Engineer with 5+ years of experience building scalable, high-performance web applications using React.js, Next.js, TypeScript and modern UI frameworks. Strong in performance tuning, reusable component design, accessibility, cross-browser consistency and high quality frontend architecture. Experienced in building real-time fintech applications with WebSocket integrations, Web3 wallet connectivity and live data visualizations. Passionate about code quality, UI consistency and improving user experience.

TECHNICAL SKILL

Languages: Javascript, Typescript, HTML5, CSS3, Node.js, SCSS, Dart (Basic)

Frameworks: React.js, Next.js 15 (App Router), Vanilla Js, JQuery, ExpressJs(Basics), Flutter (Basics)

CSS Frameworks: Tailwind CSS, Bootstrap, Material UI, AntDesign, Radix UI

State Management: Redux, Zustand, React Query / TanStack Query

Testing: Jest (familiar)

Developer Tools: VS Code, Git, JIRA, Atom Editor, AWS (S3), Vercel, IndexedDb (web), Github Actions

API & Protocols: REST API, Web Socket, NoSQL DB

Version control: Git

WORK EXPERIENCE

Frontend Engineer Loch Inc | TradeFox

Jan 2026 - Present

- Built real-time arbitrage detection engine integrating REST APIs from Polymarket and Kalshi exchanges for cross-platform trading opportunities
- Developed WebSocket services for live price feeds, order book data and real-time trade execution
- Built portfolio management dashboard with real-time profit and loss (P&L) tracking and position management
- Designed and developed reusable React component library including data tables, interactive charts, filters and responsive UI layouts
- Implemented state management using Zustand and React Query for optimal application performance
- Integrated GitHub OAuth authentication using NextAuth with JWT session management

Technologies: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Zustand, React Query, WebSocket, REST API, Web3, Blockchain, Git, Vercel

Senior Software Engineer Fyers Securities

May 2022 - Dec 2025

- Revamped a trading platform's charting module with vanilla JavaScript, improving rendering time by 20%.
- Integrated the TradingView SDK, enhancing functionality for 500,000+ users.
- Optimized candle-generation logic, reducing code complexity by 40%.
- Mentored 2 team members, increasing productivity by 25%.
- Conducted 100+ PR reviews, ensuring a 95% success rate for first-time approvals.
- Built and maintained React applications for internal organisation usage.
- Improved page load times by 35% through React code-splitting

Technologies: React.js, Next.js, JavaScript, Vanilla JS, TradingView SDK, WebSocket, REST API, Git, Performance Optimization

Senior Systems Engineer Infosys Limited | Bank of America , Infosys Limited

Jan 2020 - May 2022

- Delivered projects 100% on time by ensuring seamless team coordination and effective communication.
- Supported team efforts based on capacity, completing tasks 15% faster and maintaining project efficiency.
- Improved application scalability by 30% and performance by 25% within the React.js framework.

Technologies: React.js, JavaScript, ASP.NET, REST API, HTML5, CSS3, Git, Agile, JIRA

EDUCATION

Bachelor of Mechanical Engineering

2015 - 2019

Sastra Deemed University, 81.43%
